

CM5474 LOS SAMPLE QUESTION BANK

UNIT 1 (CO1)			
Sr. No.	Question		
	Enlist the services of Linux operating system.	R	2
	Explain the services provided by Linux Operating System	U	4
	Enlist Popular Linux Distributions	R	2
	List the basic features of Linux operating system (R)	R	2
	Describe the basic features of Linux operating system(R)	R/U	4
	Explain the basic architecture of Linux operating System with neat labeled diagram	U	4
	Describe components of Linux Operating system (Kernel, System Library, System Utility) (U)	U	4
	Describe Operating system Services (Any 4)	U	4
	Describe following services provided by operating system i) Program execution ii) I/O Operation iii) File system manipulation iv) Communication	U	4
	Describe following services provided by operating system i) Error handling ii) Resource Management iii) Protection iv) security	U	4
	Describe run levels in Linux	U	4
	Demonstrate how to get current runlevel of Linux Operating system and how to change the current runlevel by giving suitable example	A	4
	Recall the Term System call in Linux	R	2
	Enlist types of system calls	R	2
	Enlist any 2 types of system calls and give example of each	R	2
	Describe Linux file Structure by specifying different directories and their functions	U	4
	Describe Linux File System Features	U	4
	Enlist Types of Linux File System	R	2
	Recall the term shell. Enlist different shell types.(R/U)	R	2
	Summarize any four features of shell (U)	U	4
	Describe different types of Linux shell	U	4

UNIT 2 (CO2)			
	State the function of 1)uname 2) passwd command by giving suitable example	R	2
	State the use of cal command & date command by giving suitable example.	R	2
	Describe the use of following linux commands by giving suitable example i) who ii) whoami iii)tty iv) echo	U	4
	Describe the use of following linux commands by giving suitable example i) tput ii) script iii)wall iv) write	U	4
	Recall the term i) directory ii) home directory	R	2
	Describe following linux file types i) Ordinary File or Regular File ii) Device File iii) Symbolic link File iv) Hidden Files	U	4
	Describe Parent Child Relationship in Linux file system with neat labeled diagram	U	4
	Recall the term Path of A file	R	2
	Compare Path of A file with Relative Pathname	U	4
	Demonstrate the use of following linux commands i) cd ii)mkdir iii)rmdir iv)ls	U/ A	4
	Demonstrate the use of following linux commands i) cat ii)cp iii)rm iv)mv	U/ A	4
	Demonstrate the use of following linux commands i) pwd ii)cmp iii)comm iv)diff		
	Describe different file access permissions available in Linux along with its symbols and uses	U	4
	Recall the use of u,g and o options associated with linux files	R	2
	Demonstrate how to get current file permission and modify it by giving example.	A	4
	Describe symbolic method and Octal methods for changing file permissions	U	4
	Demonstrate use of grep command and it's any 4 options along with example. (A)	A	4
	Demonstrate the use following linux commands by giving suitable example i)egrep ii)fgrep	A	4
	Demonstrate the use of tr command in Linux	A	2

UNIT 3 (CO3)			
	Recall the use of 'expr' command and give suitable example	R	2
	Enlist any 2 input mode commands of vi editor and give its function	R	2
	Recall the use of following commands of vi editor i) :q ii) :wq	R	2
	State the use of logical operators && and in shell by giving example	R	2
	Give the syntax of while.....do loop in shell by giving example	R	2
	Explain the role of wild card characters in Linux. Describe different wild card characters in Linux by giving example.	U	4
	Explain command line arguments in shell script with suitable example (U)	U	4
	Describe the case statement in shell by giving example	U	4
	Describe the if...then...else conditional loop in shell by giving example	U	4
	Describe the for.....do loop in shell by giving example	U	4
	Create a shell script to print greatest of three numbers entered by the user	A	4
	Design a shell script to find factorial of a number	A	4
	Design a shell script to print Fibonacci series	A	4
	Design a shell script to find whether entered number is prime or not	A	4
	Design a shell script to find whether entered number is even or odd	A	4
	Design a shell script to find whether entered number is divisible by 5 and 7	A	4
	Develop a shell script that prompts user to enter name of the directory to be created .If directory already exist prompt the message "Directory already exist". If directory does not exist create the new directory and prompt the message "Directory created successfully"	A	4
	Develop a shell script to prompt the user to enter 3 numbers. Find the greatest and smallest number.	A	4
	Develop a shell script to check whether a file is an ordinary file, directory, readable/writable. Use command line argument to read filename	A	4

[illegible]

UNIT 6 (CO6)			
	Recall the terms i) TCP ii) IP	R	2
	Enlist TCP/IP configuration files	R	2
	Recall the use of following commands i) ifconfig ii) ping	R	2
	State the use of ping and netstat command by giving syntax (R)	R	2
	Recall the terms i) Dynamic IP address ii) static IP address	R	2
	Recall the term Samba server and write command to install samba package on Linux	R	2
	Recall the term Host based Intrusion detection	R	2
	Describe Intrusion Detection system and commands for installing tripwire IDS	U	4
	Describe in detail the concept of DHCP and its benefits.	U	4
	Explain the concept of firewall and it's working with neat labeled diagram	U	4
	Describe Types of Software Firewall	U	4
	Explain the terms i) NIS ii) NFS	U	4
	Demonstrate the use of following linux commands and it's usability by giving example i) netstat ii) route	A	4
	Construct linux command for i) captures all network traffic on the eth0 interface ii) capture all packets arriving at or departing from " www.twitter.com " and store it into "twitcapture.pcap"	A	4
	Design a firewall using iptables i) To block all incoming and outgoing traffic of www.facebook.com ii) Block all incoming traffic from the IP address 192.168.0.1	A	4
	Design a firewall using iptables that incoming SSH and HTTP traffic, and outgoing traffic on all ports. All other traffic will be dropped	A	4
